Directions (Q. Nos. 96-100) Read the passage carefully and answer the questions given below

The Walt Disney Company became the first major media company to ban advertisements for candy bars and junk food on its television channels, radio stations and websites, to stop food manufacturers from peddling nutritionally challenged fattening junk for kids. The ban covers foods with too much sugar, "too much salt or a full meal with more than 600 calories. Predictably, The outraged public said that banning smoking in public places and artery blocking trans guzzling comfort drinks by the litres was almost a human right violation.

It seems most people are not just happy choosing their own poison. They also want it in super-sized doses, guaranteed to kill sooner than later, for after tobacco use, obesity is the biggest public health bugbear that triggers more avoidable diseases and deaths than malnutrition. Overweight and obesity are the leading causes for global deaths, killing 2.8 million adults each year. World-wide obesity has more than doubled since 1980. The reasons for poor lifestyle choices are many, with almost all driven by socio-economic causes

such as low education, and limited income. Like killer infection, obesity and the resultant type-2 diabetes affect the poor more than affluent, largely because processed and fast food are cheaper and take less or no time to prepare than healthy home cooked meals. Limiting food choices, however, is not enough.

The need is not to get children off their

chairs and into the playgrounds. Too much screen time, largely social-networking followed by online and video gaming and television, are making healthy children fat and putting them at risk of type-2 diabetes in the second decade of their lives. The lifestyle disease that interferes with the way the body metabolises glucose typically affects people in their fifties and sixties and is linked with a host of complications.
