Read the following passage carefully and answer the questions that follow.

Imagine what life would be like if you weren't able to see or hear. Everything would be dark and silent all the time. Helen Keller never had to imagine it, because she lived it. She was born on June 27, 1880 in Alabama. She was very healthy and had no medical problems.

But when Helen was 1½ years old, something unexpected happened and she got very sick. For about a week, she had a terrible fever and headache. Doctors suspected she contracted scarlet fever or meningitis. She survived, but she lost her sight and hearing at the same time. Her parents were shocked.

As Helen grew up, she tried to communicate with her family and friends. It was sometimes frustrating for her because it was hard to let others know what she needed. Helen quickly realised she was different and her parents recognised she needed help.

They called the Perkins Institute for the Blind in Boston to get advice. The director said Anne Sullivan might be able to help. Anne used to attend the school when she was blind, but she got a special surgery when she was 15 and was able to see. Since she understood what it's like to be blind, people thought she could really help Helen.

Helen Keller is a great example of someone who was always determined and never let obstacles get in her way. She took the challenges life presented her and turned them into something positive. As she grew older, she wanted to help others who had the same challenges. She became an activist and her mission was to inspire others. She spent her life raising money and awareness for the rights of women and people with disabilities. She wrote over a dozen books, traveled all over the country and lived until she was 87 years old.
